This document is originated by the Management Representative for Compliance (Compliance Officer),
Casella division of IDEAL INDUSTRIES Ltd.

Changes may only be made by the Compliance Officer or Deputy.

This is a controlled document subject to automatic update and should not be copied.

2.0 Environmental policy

Casella is one of the world's leading providers of integrated health, safety and environmental solutions and specialist providers of environmental technologies for a wide range of environmental health and safety issues.

The extensive range of instrumentation manufactured and supplied includes real-time dust and noise monitors, meteorological equipment and real-time environmental monitoring solutions.

The environmental policy statement, and our environmental manual, have been defined and developed by senior management. They commit the Company to meet all applicable legal and other requirements, to which we subscribe with respect to environmental issues.

In particular:

- We will schedule and carry out environmental management reviews and auditing programmes designed to monitor our progress – in relation to our policy statements and any objectives or targets we may have set.
- We will strive not to create, emit or discharge any type of pollutant or waste.
- Our environmental management system will enable us to manage our environmental issues more effectively on a 'day-to-day' basis and an 'ongoing' basis, thereby complementing our commitment to continual improvement in all our business activities.
- Our environmental management system is documented (hard copy and electronic) and is readily available for interested parties including the public.
- We will provide appropriate training, instruction and supervision to all our employees such that they are able to perform their duties in a way that does not compromise our environmental policy and objectives.
- This policy will be communicated to everyone working for or on behalf of Casella.

Signed:

Phil Bradley, General Manager – 16th March 2017
